FEBRUARY 2011

RT-622 TRAILER ANCILLARY PRODUCT OFFER FOR REGISTERED OWNERS AND DEALER INVENTORY

The stylish, roomy and perfectly adapted Can-Am Spyder® RT-622 trailer adds to the Spyder riders' enjoyment of their roadster, no matter the weather. Owners of the RT-622 trailer have told us that after rainy day rides, they have to wipe the hood of the trailer to ensure that water does not get into the cargo hold when they open the cover. For our customer's convenience, as part of our continuous improvement process, BRP has developed a Water Management System that will be installed at the factory for model year 2011 trailers. We want our first owners to also benefit from this innovations and are offering them this new kit (value of \$69.99).

Registered owners of the RT-622 trailer will receive a letter, inviting them to call their selling dealer to arrange to pick-up – free of charge – a Water Management System Kit. We will ship to all selling dealers, one kit for each trailer sold and registered.

As well, to ensure that future customers also enjoy the advantages of this innovation, we will send Water Management System Kits to dealers with **MY2010 RT-622 trailers in inventory.**

BRP will:

- Send a letter to registered owners informing them of this Ancillary Product Offer.
- Send Dealers one kit for each trailer sold and registered - **free of charge.**
- Send Dealers one kit for trailers in stock - **free of charge.**

Dealers will:

- Install a Water Management Kit on all RT-622 trailers in inventory.
- Give a Water Management System Kit to owners of registered trailers upon presentation of their personalized letter from BRP.
- BRP will not reimburse installation costs. Registered owners can make arrangements with their dealer for the installation of their kit or install it themselves (an instruction sheet is included with each kit).
- When applicable, ship Water Management Kits to fellow dealers to whom one or more trailers have been transferred.
